

New **CONCEPT CARRIER**

Mix & MATCH

Mix and Match is a new concept in tow ball carrier systems, conceived with the goal to offer our customers a **tow ball fixing system base** on which the customer can combine **different** available **accessories**, such as cycle carriers, box, basket and luggage.

The system features not only the possibility of dynamic **Multi-Use** on the same base, but also the speed in which the different accessories can be changed, in as little as **2 minutes users** can convert from one accessory to another. Switch the platform from bike carrier into a tow-ball box or a luggage holder in just 2 minutes thanks to its **new quick fixing system**

The **BASE**
